Lab4

1.

A terminal window titled "root@Chimix: ~/OS-Lab/lab4" with standard window controls. The terminal displays a sequence of commands and their outputs:
1. Command: `./eonea`, Output: `10`
2. Command: `./eoneb`, Output: `Rani`
3. Command: `root@Chimix:~/OS-Lab/lab4#` (repeated 18 times)
4. Command: `./eonea`, Output: `10`
5. Command: `./eoneb`
6. Command: `root@Chimix:~/OS-Lab/lab4#`
The background of the terminal is a grayscale illustration of a person with long, wavy hair, looking down with their hands clasped in front of them.

2.

```
root@Chimix:~/OS-Lab/lab4# ./eonea
10
root@Chimix:~/OS-Lab/lab4# ./eoneb
Rani
root@Chimix:~/OS-Lab/lab4# ./etwoa
./etwob
./etwoc
./etwod
3
4
3.5
.66
root@Chimix:~/OS-Lab/lab4#
```

3.

```
root@Chimix:~/OS-Lab/lab4# ./mycal 2-4
./mycal 4+2
./mycal 7/8
./mycal "3*7"
-2
6
.87500000000000000000
21
root@Chimix:~/OS-Lab/lab4#
```

4.

```
root@Chimix:~/OS-Lab/lab4# ./check_file_arg eonea
./check_file_arg ../lab3
eonea is a regular file.
../lab3 is a directory.
root@Chimix:~/OS-Lab/lab4#
```

6.

```
root@Chimix:~/OS-Lab/lab4# ./compare_nums 10 20
./compare_nums 50 20
10 is less than 20
50 is greater than 20
root@Chimix:~/OS-Lab/lab4#
```

7.

```
root@Chimix:~/OS-Lab/lab4# # First, create the file it's looking for
touch file_path
./check_perms

# Now, remove your write permission and test again
chmod -w file_path
./check_perms
file_path passwords are enabled.
You have permissions to edit file_path.
